

OKAZAKI
TEMPERATURE IS OUR BUSINESS

FAN TIP THERMOCOUPLE

The Fan Tip Thermocouple has been designed with three objectives in mind, to be more accurate than other options, to be more reliable and to be readily available.

Due to its unique 8mm diameter Hastelloy X sheath the Fan Tip thermocouple can be bent and coiled to allow for any movement both horizontally and vertically.

The 40mm end tip is designed to be welded to the heater tubes on both sides which greatly reduces the chances of it breaking off while in service.
